MobiCall
Lone Worker Protection

Lone Worker Protection

Lone worker protection includes safety measures for employees who work alone. The risk management strategy aims to protect isolated workers from hazards, reduce vulnerability, and ensure they call for help if needed. Employers have the responsibility to provide adequate safety by complying with rules and regulations, provide training and supply personal protective equipment and communication devices.

MobiCall for Lone Worker Protection

MobiCall provides a comprehensive solution for lone workers. By seamlessly combining alarm triggering, management, transmission and intervention response on one platform, MobiCall ensures that help is sent to the right place.**fast. simple. reliable.**
Ensure your staff working alone are universally safeguarded with MobiCall's **DIN VDE V 0825-11** and **DGUV/SUVA** compliant SOS emergency call system, certified to the highest safety standards.

Compliance
DGUV/SUVA certified and full compliance with DGUV regulation 112-139

Positioning
Indoor and outdoor positioning system via Wifi, BLE and GPS

MobiCall.App
MobiCall.App solution via smartphones

Alarm triggering
Automatic or manual triggering of an alarm

Verticality Loss
Available for iOS and Android*

* different behavior between platforms

Data Logging
Data logging for further investigations

Portable Devices
Integrated lone worker protection infrastructure via portable devices

Monitoring & Improvement
Permanent system monitoring and improvement

Visualization
Visualization of lone worker location and positioning

Video surveillance
MobiCall receives information to access the camera or reacts to movement

Multi-language Integration
For Western European Languages*

*Specific language integration outside Western European languages upon request

Visualization

Visualizing a personal emergency call with MobiCall's powerful tool can help staff functions such as reception and security guards stay in control no matter the situation.
This visualization allows procedural instructions to guide an organization through stressful times, while optional features like controlling surveillance cameras or triggering alarm chains provide further customization according to customer needs.
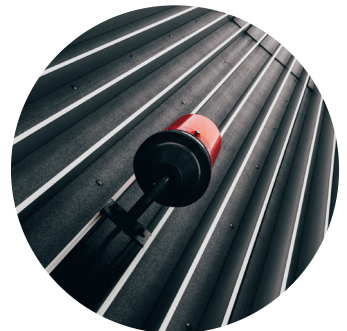

Lone Worker Protection in Five Steps

Equip Employees
Integrating portable devices such as smartphones with MobiCall, allows employees to feel safe at all times.

Trigger Alarm
Alarms can be triggered manually or automatically in case of unconsciousness.

Positioning
MobiCall consists of an accurate outdoor and indoor positioning system which helps to position the person in the fastest manner while visualizing the precise location. This allows for rescue team to react quickly and effectively

Receive Alarm
A predefined number of recipients must acknowledge the alarm. If these persons are not reached, the system initializes an alarm escalation in order to notify further participants.

History and Reporting
MobiCall logs detailed information about the entire alarm process. The alarm report can be sent automatically or retrieved from the alarm center any time. Emergency calls and conferences can be recorded as well.
